

Product Data Sheet

PROCRYPT is a natural feed additive that can support the health of animals, can cause effective use of nutritive value of fodder and can assure better product parameters at intensive breedings of domestic animals.

PROCRYPT is a natural extract from selected chestnut wood (*Castanea Sativa* Mill), from Fagaceae family, that is spread mostly on the south of Europe. It is acquired with an environment-friendly procedure – water extraction, that retains the basic qualities of the product. That is why the product is safe for animals, people and the environment.

The primary component parts of **PROCRYPT** are water-soluble vegetable poliphenols that have a

broad specter of activity. They can work as natural antibiotics without fear of waiting period and with incredible selectivity, that only nature can offer – antimicrobe effect on harmful microorganism and pleasant effect on maintaining the balance of microflora. They also can work as natural antioxidants. All this diversity of bioactive poliphenol assures better use and absorption of nutrients and stimulates immune system. Other components of **PROCRYPT** are simple sugars, lignin, cellulose and mineral substances. All the components are also component parts of plants that are used for animal diet, so the animals need them crucially for their normal development. By adding **PROCRYPT** the value of fodder is improved and balanced for better yield of animal products.

With the use of **PROCRYPT** the consumption of various medication can be lowered and part of the need for minerals replaced.
