ALFALFA

Persistence & Forage Quality

1-800-388-3659
www.keyag.com

Agronomics

Yield rating:	3
Fall dormancy class:	FD 2
Winter hardiness class:	WS 1
Multifoliate leaf expression:	76%/Moderate MF
FastGrowth rating:	1.74/Slow

Performance

- Adaptable, stable, winter-hardy variety for high-yield environments
- Fits a wide range of growing conditions and harvest systems
- Superb forage quality in a conventional variety to maximize animal performance

Pest Package

Diseases

Anthracnose	HR				
Aphanomyces-Race 1	HR				
Aphanomyces-Race 2			MR		
Bacterial wilt	HR				
Fusarium wilt	HR				
Phytophthora root rot	HR				
Verticillium wilt	HR				

Insects

Blue alfalfa aphid		R			
Pea aphid		R			

Nematode Resistance

Northern root knot	HR				
Stem nematode			MR		

Management

- Adapted to geographies where fall dormancy 2, 3 or 4 alfalfas are recommended for longer rotations
- Performs equally well when aggressively managed or harvested at later maturities
- Traffic/compaction tested

Appearance at Harvest Maturity

- Uniform, eye-appealing variety with a dense, medium-dark canopy

Yield Rating Key: 5 = Best; 3 = Average; 1 = Poor

Agronomic Ratings are based on average performance between Alforex varieties. Actual performance may be adversely affected by extreme conditions. Unless stated, ratings are based on standardized testing procedures endorsed by the North American Alfalfa Improvement Conference.

FastGrowth Ratings are calculated by Alforex Seeds from weekly measurement of varieties grown side-by-side from green-up to harvest through the growing season. Expressed as average centimeters growth per day. >2.20 = Very Fast; >2.00 = Fast; >1.80 = Average; >1.60 = Slow; <1.60 = Very Slow

Pest Resistance Ratings

% Resistant Plants	Resistance Class	Class Abbreviation
0-5%	Susceptible	S
6-14%	Low Resistance	LR
15-30%	Moderate Resistance	MR
31-50%	Resistant	R
>50%	High Resistance	HR
